Office Action Summary	Application No. 10/685,293	Applicant(s) CARADIMOS, ROBERT A.	
	Examiner Tri M. Mai	Art Unit 3727	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. The photographs are unacceptable. Applicant must submit drawings in place of the photographs.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the various shapes must be shown of the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. Claims 1-12, and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it seems that standoff is not formed from a **single piece of material** as the support and hook portion. Furthermore, this recitation is confusing. It seems that the standoff is made from a separate piece and welded on the support.

Claim Rejections - 35 USC § 102/103

4. Claims 1, 2, 4, 7, 9, 13-14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Swartz (1247033). Swartz teaches a support having a support portion with a lower portion and an upper region, back, and front, a lip 11, a hook 4, and a standoff member 9

5. Claim 3, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz in view of Fiscus (2487536). It would have been obvious for one of ordinary skill in the art to provide the a terminus that curves away from the support portion in Swartz as taught by Fiscus to provide the desired shape for the hook support.

Regarding claim 15, it would have been obvious for one of ordinary skill in the art to provide the support in the claimed dimension to provide the desired size for the support.

6. Claims 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz in view of Rogers (651058). It would have been obvious to one of ordinary skill in the art to provide clip with retainers on opposite sides and a empty central region in Swartz as taught by Rogers to save material and to access the contents easily.

Art Unit: 3727

7. Claims 6, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swart. It would have been obvious for one of ordinary skill in the art to provide the dimension as claimed to provide the desired support for the container.

Regarding claim 8, it would have been obvious for one of ordinary skill in the art to provide the support with the cross piece to provide the appropriate design for the support portion.

8. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swart in view of Goodnow. It would have been obvious to one of ordinary skill in the art to provide a support having inverted shapes of V or A in Swart as taught by Goodnow to provide an alternative support.

It would have been obvious to one of ordinary skill in the art to provide the support having inverted shape as an inverted "U" to provide an alternative shape of the stand.

9. Claim 1-5, 7-14, 16, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Sullivan (5542314). Sullivan teaches a support portion, a lip at 58, 60, hooks 54, and standoff member 104,

Regarding claims 13 it is regarded as an intended use to provide the standoff to be positioned in the horizontal surface in Sullivan. The intended use limitations do not impart any structure over the structures of the support in Sullivan.

10. Claims 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz in view of Sullivan. It would have been obvious for one of ordinary skill in the art to use the support of Swartz for supporting a notebook computer to enable to have access to a computer while driving and/or working inside a vehicle.
